ELECTRIC **PADDOCK FENCING**

**FOR HORSES
AND CATTLE**

HAVE YOU EVER WONDERED WHERE YOU COULD GET A DURABLE AND FUNCTIONAL ELECTRIC FENCING?

Silber fences are developed in cooperation with equestrian specialists. The emphasis in the design has been on endurance in everyday usage and on functionality in extreme conditions. The reliable flow of the electric current has been secured with unique patented technology.

DOES NOT RUST OR DECAY, DURABLE EVEN IN SUBZERO TEMPERATURES

Silber fences are made of aluminium which is a great material for outdoor usage. Compared to normal pipe fences made of iron, aluminium's advantage is its ability to resist corrosion.

Wooden posts are vulnerable for decay and horses tend to chew them. Aluminium pipes are a more durable choice – you can forget the constant maintenance. Plastic fences often

break if temperatures drop to extreme levels and if the fence takes any minor hits. Aluminium pipes do not crack even at extremely low temperatures. The electricity runs inside the horizontal pipes, therefore you will not need to attach any additional wires.

THE ELECTRICITY PREVENTS ANIMALS FROM LEANING AGAINST THE FENCE

As the electricity runs inside the pipes and the gate, the animals do not chew the fence or lean against the gate. Therefore the fencing remains in good condition.

SAFE AND ELEGANT

Aluminium pipes do not have any sharp edges or repellent liquids that could harm the environment or the animals. The elegant appearance is also important as paddock fences are a natural part of the stable or farm milieu.

Together we will find the
best combination for you!

FOR EQUESTRIAN FACILITIES AND MODERN LIVESTOCK RANCHES.

Silber fences are built from horizontal and vertical aluminium pipes. The insulator spacers separate the current from conducting to the ground.

FENCING FOR YOUR NEEDS

Silber fences can be transformed and modified along with your fencing requirements. Silber gates are light and easy to use when working with animals daily. Select the most suitable fence and gate models to create the best combination for you.

USE LOCAL PARTNERS OR INSTALL BY YOURSELF

Our local Silber partners provide experienced and high-quality services for the installation. If you want to build Silber fences by yourself you can ask us tips and instructions for the installation.

Silber fencing is the best choice for you if you want your paddock to be durable, elegant and easy to maintain.
